**Elizabeth Brooks**

THIS ISSUE ushers in the shortest month with its two most nationally important birthdays-and, First but not least, Westminster's 69th classic. It is doubly significant to us this year as we are considering the breed classes as our Specialty Show and have arranged a very attractive premium list. All prize money and trophies are open to all. We hope to have a five point entry in both sexes and for those lovers of the breed who have given up showing for the duration. Do come to the show and bring your friends as the proceeds of this entire show go to the National War Fund, Inc.

By this time the Xmas pup (like our selves has broken the most carefully made New Years resolutions, and while we can alibi ourselves out of everything, what about the poor pup? Has he fallen from grace? If so, lets forgive him and take a look at our disciplinary errors and start over again. You will make better headway, too, if you remember these three most important 'Donts" Don't let him get the upper hand! Don't over feed! Don't over exercise!

Keep in mind that he is only a baby and will thrive according to our treatment and teachings. A healthy, well-trained dog is one of our greatest assets, and I do wish you every happiness with yours
